

Ekta model create kora holo -

php artisan make:model Sales -m

Queue documentation: <https://laravel.com/docs/8.x/queues#the-queue-work-command>

First run,

php artisan queue:table

php artisan migrate

next make a job,

php artisan make:job SalesCsvProcess,

Example code from SalesCsvProcess, Ekhane jei process ta queue er moddhe hoy oi process ta thake ekhane,

```
public function handle()
{
    $path = resource_path('temp');

    $files = glob("$path/*.csv");

    $header = [];

    foreach ($files as $key => $file) {
        $data = array_map('str_getcsv', file($file));

        if ($key === 0) {
            $header = $data[0];
            unset($data[0]);
        }

        foreach ($data as $sale) {
            $salesData = array_combine($header, $sale);
            Sales::create($salesData);
        }

        unlink($file);
    }
}
```

Then we need to dispatch the job from the controller,

```
public function store()
{
    SalesCsvProcess::dispatch();
    return "stored";
}
```

Then .env theke queue connection ke database e convert korte hobe,

```
QUEUE_CONNECTION=database
```

Erpor shob job table e added hobe process gulo. Process run korte use hoy,  
php artisan queue:work
